

W.L. Hailey & Company Awarded Design Build Institute of America for Robbins Air Force Base Project

Nashville, Tenn., April 4, 2005 -- The Design Build Institute, Southeast Chapter, has awarded W.L. Hailey & Company, Inc. and Earth Tech the Best Industrial/Process Sector Project 2004 Design Build Award for the design and construction of the Robbins Air Force Base storm drainage system project.

The Design-Build Institute of America (DBIA) is a membership organization that advocates and advances single-source project delivery within the design and construction community. The design-build method embraces architecture/ engineering and construction services under a single contract. DBIA members include practitioners from all project phases, including public- and private-sector project owners.

“We take pride in every job we do,” says George David Waller III, President and CEO of W.L. Hailey & Company. “It’s an honor to be recognized by our peers for a job well done. The design-build method enabled us to complete this project ahead of schedule, despite many obstacles, in a timely manner and within budget. This project represents the high-quality work for which we are known.”

Founded in 1925, W.L. Hailey & Company, Inc. provides multi-faceted, heavy construction services for both municipal and private customers, with an emphasis on infrastructure projects that include the treatment and conveyance of water and wastewater. One of the largest environmental construction firms in the US, W.L. Hailey employs more than 350 highly skilled and experienced managers and craftsmen who provide professional expertise, accuracy and efficiency while working in challenging work environments.
