

W.L. Hailey Named One of Top Environmental Firms by Engineering News Record Magazine

Nashville, Tenn., July 21, 2005 -- Engineering News-Record (ENR) magazine has ranked W.L. Hailey & Company, Inc. as number 74 in top environmental firms in the US. ENR ranked companies based on 2004 gross revenue for providing environmental services and products to domestic and international markets.

ENR's list of the top 200 environmental firms provides a comprehensive package of data and analysis, with tables showing the annual sales of the industry sector. Top firms in all environmental fields are considered, including design/consulting studies, construction remediation, hazardous waste, nuclear waste, water treatment/supply, waste/storm water treatment, air pollution control, environmental management and environmental sciences.

"We are pleased to be ranked as one of the top 200 firms by ENR," said George David Waller III, President and CEO of W.L. Hailey & Company. "Our company has a history of building infrastructure crucial to the growth and development of communities. We strive to complete major construction projects in challenging work environments, while providing the best value for our clients. The continued growth of our company speaks to our success in this goal."

Founded in 1925, W.L. Hailey & Company, Inc. provides multi-faceted, heavy construction services for both municipal and private customers, with an emphasis on infrastructure projects that include the treatment and conveyance of water and wastewater. One of the largest environmental construction firms in the US, W.L. Hailey employs more than 350 highly skilled and experienced managers and craftsmen who provide professional expertise, accuracy and efficiency.
